

- LOCATION **Ingliston Country Club, Bishopton, Scotland**
- SYSTEM SIZE **120kWp**
- EXPECTED ANNUAL GENERATION **90,540 kWh**

Locogen were approached in early 2011 by Ingliston Country Club, who required expert advice on the best renewable energy solution to reduce their carbon footprint and provide a solid financial investment for the club.

Locogen's initial assessments found a 120kWp solar PV installation would be best suited to the location. Locogen then provided a complete consultancy service to the club and oversaw the project from start to finish.

The necessary consents were secured before a bespoke design stage which matched the planned installation to the characteristics of the site and available roof space.

The finished system consists of 542 solar PV modules installed over two roofs. The solar panels are connected to the grid using Fronius inverters.

The PV array was installed in four weeks and was the largest in Scotland when commissioned in July 2011.

Locogen accredited the scheme with Ofgem just before a major change in the government's Feed-in Tariff incentive, allowing the club to benefit from 20 years' guaranteed income at a highly favourable rate.

*"We are immensely proud to be running one of the biggest commercial solar PV operations in the UK, as part of an on-going initiative to draw our energy needs from renewable resources. We are very grateful to Locogen for their expert advice and management, helping the project to be delivered within budget and in time for us to benefit from higher FiT rates."*

Paul Fraser, Managing Director

Locogen's team has several years' experience in the feasibility, design, installation, commissioning and operation of commercial solar PV schemes. We have completed installations throughout the UK for a range of agricultural, retail, industrial, manufacturing and public sector clients, working on a wide variety of pitched and flat roof types.

We have in-house consenting, design and installation teams as well as an Asset Management Team who can remotely monitor operational systems on a daily basis to ensure they are working efficiently. A list of some of our installations is provided below. Please contact us if you would like any advice on solar PV at your site.
