

- LOCATION **Newlands Farm, Selby, North Yorkshire**
- SYSTEM SIZE **50kWp**
- EXPECTED ANNUAL GENERATION **44,050 kWh**

Newlands Farm, near Selby in North Yorkshire, is a large arable farm producing fresh vegetables and cereals. The farm is owned and operated by William Platt, who was keen to install roof-mounted solar to reduce the farm's carbon impact and offset the large electricity costs from their cold storage and grain drying facilities.

Having explored opportunities for wind energy at other sites, William decided to pursue a lower-risk option at Newlands Farm to boost the farm's environmental performance and secure a long-term income from the Feed-in Tariff (FiT).

Locogen completed an energy yield and financial assessment of the site and designed a scheme to match its energy requirements. The system consists of 200 x REC 250PE panels and is connected to the grid via ABB inverters.

Around 80% of the electricity is used onsite, saving thousands of pounds over the course of the project. Any surplus is exported to the National Grid where it will be used locally.

Locogen provided a turnkey service for the project, managing the works from the initial energy yield assessments right through to the installation, commissioning and FiT accreditation of the system.

"I am delighted with the attention to detail and the quality of the service I received from Locogen. The project was designed to match my needs, they discussed a number of different panel options with me and sorted out the relevant consents very efficiently. The installation was quick and straightforward, with no impact on the farming activities."

William Platt, Owner

Locogen's team has several years' experience in the feasibility, design, installation, commissioning and operation of commercial solar PV schemes. We have completed installations throughout the UK for a range of agricultural, retail, industrial, manufacturing and public sector clients, working on a wide variety of pitched and flat roof types.

We have in-house consenting, design and installation teams as well as an Asset Management Team who can remotely monitor operational systems on a daily basis to ensure they are working efficiently. A list of some of our installations is provided below. Please contact us if you would like any advice on solar PV at your site.

COMPLETED SOLAR PV INSTALLATIONS

Completed	Name	Size (KWp)	Location
2010	Glasgow University	120	Glasgow
2011	Dowhill Farm	50	Ayrshire
2011	Princes Gate Spring Water	50	Pembrokeshire
